

Second ISOPE Underwater Systems Symposium

**at the 27th Annual International Ocean and Polar Engineering Conference
San Francisco, California, USA, June 25–30, 2017**

First CALL FOR PAPERS

Technical session and symposium on underwater systems will be held at the annual conference of ISOPE-2016. The technology of underwater systems is the key to global environmental issues or energy and resources survey and recovery. This symposium deals with broad-ranging topics about underwater systems including design and operation, propulsion, maneuverability of ROV, AUV, UUV, towing vehicles and oceanfloor vehicles. Related technologies such as USV, control system synthesis, positioning, navigation, underwater acoustic communication and imaging are also discussed.

The organizing committee cordially invites scientists and engineers from academia and industry to share their latest advancements. Papers are required for peer-review prior to final acceptance. Conference Proceedings are INDEXED by Engineering Index, Compendex, Scopus, Web of Science, and more.

Special ISOPE room rate at 5-star hotel starts from \$169 /night.

Suggested Technical Topics

- **Design & operation of underwater vehicles**
- **AUV, UUV design & operation**
- **ROV design & operation**
- **USV design & operation**
- **Robots, robotics & control**
- **Propulsion of underwater systems**
- **Positioning & navigation of underwater systems**
- **Control system synthesis for underwater systems**
- **Motion control & maneuverability of underwater systems**
- **Acoustic communication & imaging**
- **Exploration, survey & sensing**
